Micro Scooter 1.064

The 1.064 is the world's first electric micro scooter.

With its extremely small turning radius of only 500mm it's a mobility scooter for the smallest of spaces. Ideal for someone who needs assistance with mobility at home or in residential care.

This mobility scooter is simple to operate, easily moves across carpets and the rotatable seat allows for getting in and out with ease. With powerful 200 W motor.

Easy Transport

- > Fold down backrest
- > Dismounts into three parts (battery, seat, chassis) without the use of tools

Armrests flip up

- > This feature together with the hi-low option allows for the ideal sitting position at tables

Get in & out with ease

- > The rotatable seat also allows for easy seat transfers to other seats or beds

Adjustable Seat Height

- > 4 Height Positions on the manual chair 1.064
- > 100mm electric lift with the 1.064UP version
