HIGH QUALITY

DESIGNED & MANUFACTURED IN DENMARK
**Independence Chairs**

**Greater independence and dignity**

Ideal for the following conditions:

- Spinal disorder
- Mobility impairment
- Walking Impairment
- Arthritis
- Multiple sclerosis
- Cerebral palsy
- Neurology
- Muscular dystrophy
- Amputation
- Parkinsonism
- Back pain
- Stroke
- Restricted growth

**Optional Accessories**

**Strolling Bracket**
Improve the working environment of the care provider, e.g. when the user is moved sitting in the chair. Recommended to use with foot rest.

**Foot rest - Fold up**
The feet can rest while sitting or moving around. Can also be used as a step when getting in and out of the chair.

**Larger CY Seat**
The CY seat (W:47xD:49 cm) is a comfortable, padded seat with a rounded front. The user enjoys good supportive sitting comfort, and the seat design also ensures good blood flow to the legs.

**T-grip for break handle**
People with pains and reduced joint mobility may benefit from the T-grip. It reduces twists in the body and back, when using the brake on the chair. To increase the height, a brake extender is also available.

**Award Winning Design**

VELA Tango 500 with ALB backrest (pictured above) won the prize for “Best New Design” at the Scandinavia Health & Rehab 2016 fair in Copenhagen.

**Tango a Unique Chair**

More functional than a wheelchair or walker for indoor tasks

**Support & Comfort**
Backrests - All Tango models are available with a varied selection of backrests so that the chair can be adapted to the individual user. Each back can tilt and is height adjustable.

**Ergonomic**
Seat options - The adjustment of the seat height, depth and tilt plus adjustable backrests and armrests ensures the optimum ergonomic sitting position.

**Height Adjustable** - All chair models are available with manual or electric height adjustment. The electric height adjustment can be operated from the left or right hand.

**Easier Transfers**
Armrests - The soft armrests are height and width adjustable. They can also lower down to seat height for easier transfers to seat, bed, toilet or wheelchair.

**Safe**
Central Brake - The Vela chair has a unique braking system that ensures the user a stable and comfortable workplace.

**Walkable**
Directional Wheels - The chair is equipped with four smoothly running directionally stable wheels that allow the chair to be “walked” around so that the user can get around at home unassisted.

**Footrest**
Foldable Footrest - The feet can rest while sitting or while being moved around.

**Increased Reach**

**Personal Hygiene**
