| 4 pole motors - Improves torque | 4 pole | 2 & 4 pole |
| Total Motor Power - WATTS | 1300 | 600 - 700 |
| Total Battery capacity - Ah | 200 | 60 - 140 |
| Range - Km | 30 - 35 | 25 - 35 |
| DRIVE COMFORT | | |
| Over kerbs & uneven terrain | Yes | Test drive to compare |
| Active 4 caster suspension | Yes | |
| SUPER LOW SITTING | | |
| At a table (seat plate to floor minimum) | 15"/ 38 cm | 17.5"/ 44 cm |
| Improved stability when driving | Yes | Test drive |

*versus other manufacturers MWD with power tilt & elevate function available in NZ

FASTER
15 kmph speed

SMOOTHER RIDE
Active suspension

SIT LOWER
Under a standard table

Outdoors like never before

Faster & Smoother

The TAIQ LC is faster than all other powerchairs with a maximum speed of 15 kmph. Powerful 4 pole 650 watt motors provides more torque for hills and for uneven terrain. Wider tyres also improve traction, when the ground underneath is softer.

More time for me

New adventures give me inspiration to dream, contemplate and live life to the full.

Now I can sit lower

At the end of the day, I can sit under any standard table with my mates.

*Now I can just about
adventure any where outdoors.
Then also indoors I can still
easily manoeuvre.*

*You can
see me and not my
powerchair.*
